

## *Journal of Japanese Scientists*

A monthly magazine for scientists and citizens published by the Japan Scientists' Association (JSA) *Journal of Japanese Scientists (JJS)* has been established in 1965 as a unique comprehensive academic journal, in which scientists and citizens share various subjects relating to contemporary human society and interests in nature.

### SCOPE:

Nowadays, we are certainly depending on advanced sciences and technologies at every situation in daily life and everywhere on the earth. They have developed to an indispensable part of industries for a century. While their progresses are changing our life style rapidly beyond our experiences, they have brought destructive products and new anxieties to us as well.

Now we really need to make sciences and technologies common properties in human society, taking them back from a small number of professionals and the organizations monopolizing a huge amount of benefits. For this purpose, *JJS* has strongly promoted the collaboration between scientists and citizens, and then *JJS* contributes to the human society in which all the citizens enjoy the outcome of sciences and technologies. *JJS* sheds light on the factors hindering inherent progress of science and contributes to remove them. The collaborations between scientists and citizens in *JJS* would help the progress of science in many ways.

Editors encourage researchers concerning the concerted development of science and human society to submit papers and letters to *JJS*. The papers in English are published online in *JJS* in the JSA web page.

### TABEL OF CONTENTS:

VOL 53 issue 603 (April)

#### ***SPECIAL FEATURE : Paddy-Field biodiversity and Its Conservation: Integrated Biodiversity Management (IBM)***

Introduction      KIRITANI Keiji

Glossary

How do We Understand Plant Adaptation in Paddy Environment?      MINETA Takuya

Plankton in the Paddy Fields as the Basis of Biodiversity      HAYASHI Norio

New and Rare Species of Gastrotrichs in Paddy Field      SUZUKI Takahito

Paddy-Field Insect Biodiversity and Its Conservation      MORIMOTO Nobuo

Fishes in Paddy Fields and Canals: Perspectives toward the Restoration of Fish Diversity in Paddy Fields      ICHIKAWA Noritaka

A Farmer's Look into Living Organisms in Paddy Fields: An Approach to Implement Integrated

Biodiversity Management    UNE Yutaka

**ESSAY**

For Two Years I Have Adorned *JJS* Cover with My Illustrations    WAKAMATSU Michio

**OPINION**

Impoverishment of Rural Districts Affects an Urban Life    SETO Masayuki

**REPORT**

Findings from Questionnaire about Conditions of Research, Education and Duties of the Teaching Staff Belonging to National Universities    MURAI Atsushi

**LETTER**

Five-Year Limit to Employment of Adjunct Professors Has Mostly Been Given up, but the Union's Struggle Continues    SHIDA Noboru

Readers' Comments    Edited by the editorial committee

**INFORMATION**

Activities of the Japan Scientists' Association    Edited by the office

**ARCHIVES:**
